

## JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Recently retired, after spending numerous years working with his brother to manufacture their crane company into an market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

While on their journey, John spent time talking to former business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite marketplace for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they manufactured and sold the first JLG aerial work platform. The company incorporates many of the basic design essentials of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has extended itself into quite a few international markets and continues to cultivate modern machines to ensure that consumers are able to become safer and more efficient within their workplace.
